

Phase 2 - Create New Custom Table

Import Data using Transform Maps (Spreadsheet) - ServiceNow

Goal: create the target table (Employee Test) where the imported records will be stored.

Navigation

- Tables > Create New

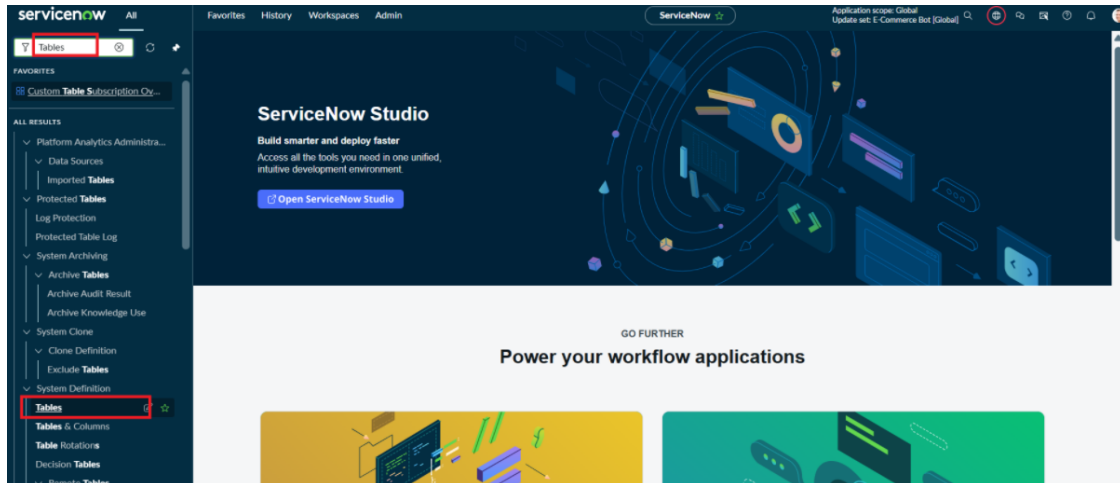

Table details

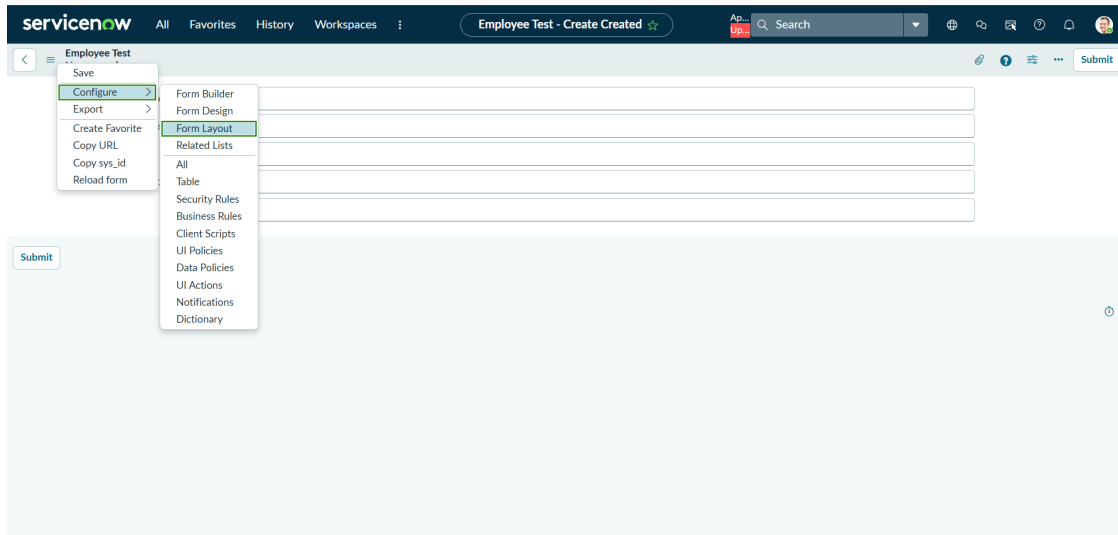

- Label: Employee Test
- Name: u_employee_test
- Save the table, then scroll to the bottom of the table form.

Column label	Type	Reference	Max length	Default value	Display
Employee ID	String			false	false
Employee Name	String			false	false
Email	String			false	false
Department	String			false	false
Location	String			false	false

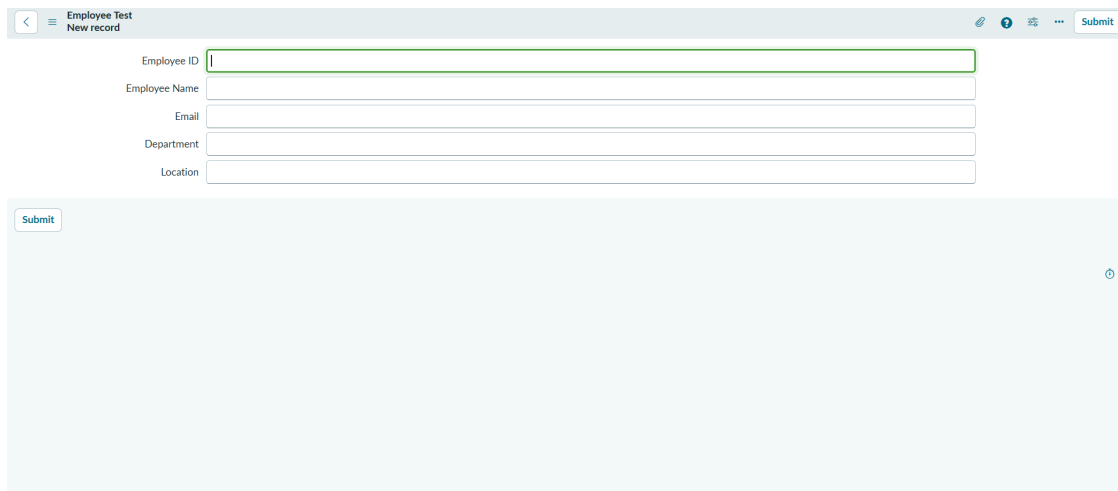

Add columns using Form Layout

1. Click Show Form to open the table form.

2. Click the Form Context Menu / Additional Actions icon (left side of form header).
3. Click Configure and select Form Layout.

4. In Form Layout, click New to create a new field.
5. Enter Column Label: Employee ID, Type: String, then click Add.
6. Repeat for the remaining fields (all Type: String):
 - Employee Name
 - Email
 - Department
 - Location
7. Click Save, then verify all fields appear on the Employee Test form.

8. Click Submit or Save.
